RUSTAM BHADOURIYA

Generative AI & Backend Developer | Python | LLM Applications | Open Source

LinkedIn | GitHub | rustambhadouriya7@gmail.com

Uttar Pradesh, India

PROFESSIONAL SUMMARY

Generative AI and backend developer building Python-based tools, LLM integrations, and open-source software. Developed RSRoute, a self-hostable FastAPI gateway for LLM APIs with chat and agent endpoints, alongside a companion Python package. Built additional AI tooling projects including NULL, Techno, and Blade, as well as rslearn-ML. Experienced with REST APIs, provider integrations, Docker, testing, CI/CD, and machine learning workflows. Focused on reliable AI systems, agentic applications, and backend engineering.

TECHNICAL SKILLS

Programming: Python, C++, SQL fundamentals
AI / Machine Learning: Generative AI, LLM APIs, prompt engineering, agentic workflows, scikit-learn, TensorFlow, PyTorch, Keras, NumPy, Pandas, feature engineering, model evaluation
Backend Development: FastAPI, REST APIs, Pydantic, API integrations, async Python
LLM Ecosystem: Google Gemini, Mistral AI, Groq, LangChain tools, Ollama
Developer Tools: Git, GitHub, Docker, CI/CD, Linux, unit testing, PyPI, open-source development
Data: Data preprocessing, Matplotlib, model validation

SELECTED PROJECTS

RSRoute — Self-hostable LLM API Gateway

Python, FastAPI, Pydantic, Docker, REST APIs, Gemini, Mistral AI, Groq

- Built a lightweight, self-hostable gateway that allows applications to call supported LLM providers through a consistent API.
- Implemented provider chat endpoints and a Gemini agent endpoint supporting tool-call responses, with routing and test coverage.
- Designed master-key authentication, standardized API response templates, Docker setup, and CI workflows.
- Repository: github.com/ItzRustam/rsroute

RSRoute Python Package

Python, PyPI, LLM API clients

- Published a companion Python package to simplify integration with RSRoute from Python applications.
- Added provider clients and support for agent workflows.
- Repository: github.com/ItzRustam/rsroute-package

rslearn-ML

Python, NumPy, PyPI, unittest

- Developed a NumPy-based machine learning library without a scikit-learn dependency.
- Implemented regression, K-nearest-neighbor, pipeline, and evaluation utilities.
- Published the package on PyPI and developed tests and project documentation.
- Repository: github.com/ItzRustam/rslearn-ML

NULL — Multi-Agent AI System

Python, Pydantic, LLM APIs, CLI/TUI

- Built a multi-agent system with distinct agents for coding, tool use, and orchestration.
- Used Pydantic schemas for structured data and model interactions, with a command-line interface.
- Repository: github.com/ItzRustam/NULL

Techno — Tool-Using AI Agent

Python, ReAct-style tool use, web search, APIs

- Developed an agent core supporting web search, text processing, file operations, and Python execution.
- Applied tool-using agent workflows to API-related tasks.

Blade — Agent Framework/Core

Python, ReAct-style agents, tools

- Built a ReAct-style agent core with tools for web search, text processing, file operations, and Python execution.
- Designed tool-use workflows without relying on LangChain's create_agent abstraction.

EXPERIENCE

Founder & CEO — rsKind

October 2026 – Present | Remote

- Lead a project-driven initiative focused on Web Development, Python Development, and Agentic AI.
- Coordinate early community and team-building efforts around practical software projects.

Kaggle Contributor — Kaggle

July 2026 – October 2026 | Remote

- Worked on machine learning competition workflows involving feature engineering, model development, evaluation, and optimization.
- Built and evaluated Python ML pipelines using preprocessing, model selection, and validation.

Machine Learning Engineer Intern — CodeAlpha

July 2026 – August 2026 | Remote

- Built and trained machine learning models using Python and deep learning frameworks.
- Worked across preprocessing, feature engineering, model training, and evaluation.

Artificial Intelligence Engineer Intern — CodeAlpha

July 2026 – August 2026 | Remote

- Worked on Generative AI applications and LLM-based workflows for AI engineering tasks.
- Used Docker-based development workflows.

Machine Learning Engineer Intern — QSkill

June 2026 – July 2026 | Remote

- Worked on practical machine learning and model building using Python-based data processing.

Data Scientist Intern — Zetheta Algorithms Private Limited

June 2026 – July 2026 | Remote

- Worked on machine learning, feature engineering, and data engineering using practical datasets.
- Gained experience with CI/CD and software development workflows.

CERTIFICATIONS

- Machine Learning Explainability — Kaggle
- Machine Learning — Kaggle
- Generative AI in Software Development — IBM
- Large Language Models — IBM
- Warehouse Logistics Professional (WLP) — Zetheta Algorithms Private Limited
